

Workshop notes

FORGE FILES / ORIGINAL PRACTICE DOCUMENT

1. Materials and quantities

This document uses invented workshop data for testing file conversions.
It contains selectable text, a simple table and deliberately small labels.
Use it to check reading order, page boundaries and editable table cells.
No customer information, signatures or personal records are included.

Item	Quantity	Unit
Wood panels	12	pieces
Steel brackets	24	pieces
Water-based finish	3	litres

Inspect after conversion

Check that quantities remain beside the correct items.
Compare line breaks and spacing with this original PDF.
A readable preview does not prove that every word is editable.

Fine-print test: 0123456789 / Brackets 24 / Finish 3 litres
